

Vectis company secretarial software is FD's in-house solution to **online filing** and **electronic company register maintenance**. Vectis pays for itself with time and efficiency savings. Its multi-company and web-based functionality covers minutes, share certificates, filing requirements and Companies House approved forms on and off line for both professional and business users alike. Now you can **update client registers instantly**, recording and updating minutes and filing forms online immediately after meetings. It's entirely FREE to set up and use for deadlines, workload schedules and reminders, with all basic company data entered by FD automatically if you incorporate with us.

100% web based - any browser - anywhere - anytime
Quick sign up without software installation

With compliance issues taking more prominence it is vital that company registers are kept up to date. Vectis makes the task quick and simple and you will no longer need to hunt around the office or delve into files to find out who is in which position and what decisions were taken at a meeting. It's all on the web on our secure server so you can access it any time from any computer.
